

# CHILDREN'S BIOME BOOK - BIOME RESEARCH

/20 Points

Completion Date: Thursday, October 13th

Our Biome \_\_\_\_\_

Team Members' Names \_\_\_\_\_

1. Color in locations where your biome is found:

2. List countries or locations where your biome is found.

3. Describe the weather conditions, seasons, and climate in your biome.

Are there special weather events?

Average rainfall:

Average snowfall:

Average temperature(s):

4. List the following organisms. You will need to use ones that can work together in a food web. Provide at least three of each. (Apex predator will only have one.)

Producers:

Primary Consumers:

Secondary Consumers:

Tertiary Consumers:

Apex Predator:

Decomposer:

5. List the abiotic factors found in your biome.

6. How have humans negatively impacted the biome? Find as many ways as you can.

Impact #1 -

what have the humans done? -

why did humans do this? -

what happened to the land as a result? -

what happened to the plants as a result? -

what happened to the animals as a result? -

How can this be fixed or reversed? -

Impact #2 -

what have the humans done? -

why did humans do this? -

what happened to the land as a result? -

what happened to the plants as a result? -

what happened to the animals as a result? -

How can this be fixed or reversed? -

7. Describe two different species interactions found in your environment.

Interaction Type 1 -

Description of how these species interact -

Interaction Type 2 -

Description of how these species interact -

8. Find a natural resource from the biome.

Natural resource -

How is it removed -

How is it used and by whom -
